

## ADDRESSED TO WOMEN

## Hot Flashes—Dizziness

Are among the most common of the many danger signals nature sends in advance of that period in a woman's life when her delicate organism undergoes an important change. It is a warning. Serious consequences may follow any carelessness just at this time. Your health must have first consideration.

## Dr. Pierce's Favorite Prescription

## Makes Weak Women Strong Sick Women Well

This Famous Prescription has brought relief under these circumstances to thousands of women during the past forty years. It can now be had of medicine dealers in liquid or tablet form as modified by R. V. Pierce, M. D., or send 50 one-cent stamps for trial box of tablets.

Every woman is invited to write and receive confidential and sound medical advice, entirely without cost, from a physician who makes ill of women his specialty.

## Consultation Free

Address: Faculty Dr. Pierce's Invalids' Hotel  
Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

## "Bedfast—For Two Years"

Mrs. GEORGE E. WELLS writes: "I know your medicine helped me wonderfully. I was so weak and nervous I could not sleep. Had a very poor appetite. Had such an aching between my shoulders and neck and dreadful headaches. My tongue would be heavily coated every morning and would get so dry. I am 45 years old. Have been having 'change of life.' I doctored a great deal but your medicine helped me more than all the doctors. I took six bottles of 'Favorite Prescription' and three of 'Golden Medical Discovery.' I can now sleep good at night. My tongue is not coated and your medicine has removed many of my symptoms. I know if I had taken your medicine for two years, now I do all my work and attend to my garden and chickens. I cannot praise Dr. Pierce's medicine too highly."

## MOCTEZUMA SHAFT DEEPEST IN STATE

Company at Pinar, Sonora, Going Down 2,000 Feet. Rosales and Good Enough Properties Are Leased.

Douglas, Ariz., Sept. 27.—The three compartment shaft of the Moctezuma Copper company, at Pinar, Sonora, having encountered the bottom ore in the history of the camp at the depth of 1,100 feet, the management has decided to continue sinking to the 2,000 foot level. This will be the deepest shaft in the state of Sonora. While the ore is increasingly good with depth, it is evident that water level has not yet been reached, as the shaft was making but two fathoms per minute at the 1,100. The shaft is already the deepest in the Moctezuma district.

A larger hoisting station is being cut on the 700 level of the Guadalupe shaft or the same company. This is also a three compartment shaft. It will be equipped with three ton skips and a large electric hoist. It is the ultimate intention of the company to make the Guadalupe the main hoisting shaft.

The Rosales property, in the Tabo-tacochi district has been taken under lease and bond by James Nolan and J. B. Beale. The mine belongs to Douglas people, Dr. J. J. P. Armstrong being the principal owner. It has been a heavy sufferer from the operations of high graders since the beginning of the Madero revolution. The main tunnel has been practically gutted of its richer grade silver ores.

The Good Enough property, a gold proposition, has been leased by Sam Finch and Louis Gallo. This is in the Mexican district. They are now at work with a small force.

## GAGE MINES AGAIN SHIPPING OUT ORE

Work Has Resumed at Famous Heart Camp Only 20 Miles From Deming Where California Made Big Money.

Gage, N. M., 20 miles West of Deming, Sept. 27.—Gage, once noted as the shipping point for one of the famous Heart mines, gives promise of coming into prominence again as an ore shipping point.

One mine has been shipping an average of ten cars a month to El Paso and recently—since the shipments are lighter, owing to development work—the cars have been netting \$1000 to \$1200 a car. Frank Wyman, manager of the company for New York owners and is working about 25 men. The ore is silver and lead sulphide. A car of ore was loaded out this week.

W. L. Bradley has another claim and Corbett and Wyman have another. Wilbur Judson is managing the development work for Corbett and Wyman.

Mr. Bradley is on a deal to sell his mine and, if it is sold, it is understood that extensive operations will be commenced.

The old Victorio mine of the late senator Hearst, of California, was located in the same vicinity as these mines and it is said to have produced \$3,500,000 in values.

## ERNESTINE ADDS TO MILL CAPACITY

Socorro Company Ships Gold and Silver Bullion to the Mint; Little Charlie Ships 50 Tons of Ore Daily.

Mogollon, N. M., Sept. 27.—At the Ernestine Mining company, the crushing capacity of the mill has been increased from 100 to 150 tons per day. Another ore shoot has been cut in making the main shaft, at about 650 feet below mill level. The work will proceed to the 700 foot level, when drifts will be run.

At the Socorro Mining and Milling company approximately one ton and a fourth of gold and silver bullion were consigned to the United States mint during the week, before the clean-up for the first half of September. Several tons of rich concentrates were also shipped to the smelter.

By the Oakes company, another lease has been let on the Johnson mine, of the East End Tunnel group, making three leases now in operation on the property. Some fine milling ore is being produced. Work on the Trilby group, under option, will be started soon. This adjoining the Tunnel group on the east.

The Mogollon Gold and Copper company's Little Charlie mine, operated by a Los Angeles firm under lease and bond, has recently been shipping over 20 tons a week from the operations of high graders since the beginning of the Madero revolution. The main tunnel has been practically gutted of its richer grade silver ores.

## MOGOLLON MINES DRAW OPERATORS

Silver City, N. M., Sept. 27.—Regular shipments of gold and silver bullion from the Mogollons, amounting to several tons per month is drawing the attention of large operators to that camp, who are examining it with a view of securing options on various properties as the first step to a consolidation of the entire district.

Two engineers representing separate corporations are now in the field, and the coming year will doubtless witness the inauguration of work of the magnitude which the camp justifies. All the present mills are crowded to their full capacity, the output exceeding \$150,000 per month.

## CALIFORNIA OIL FLOW BENEFITS DOUGLASITES

Douglas, Ariz., Sept. 27.—The news that the Calumet Oil company, whose property is located in the Santa Clara valley of Ventura county, Calif., had struck a flow of 120 barrels in 24 hours, in its newest well, brought joy to a number of local stockholders.

Among the local men interested in the company are: J. S. Douglas, W. H. Brophy, Thomas Collins, W. P. Staunton, Alfred Paul and Samuel P. Applewhite.

## OCTAVE MINE, NEAR STANTON, TO RESUME

Several Other Properties in Yavapai County Doing Much Work—Former Santa Fe Mayor Mining.

Prescott, Ariz., Sept. 27.—One of the most important pieces of mining news made public in Yavapai county for several months is that operations are to be resumed soon on the old Octave mine, near Stanton.

H. C. Gibbs, president of the company, and D. P. Leach, secretary, have filed a deed of trust to the International Trust Company of Massachusetts, to secure a bond issue of \$50,000. The bonds will be sold for the purpose of paying off all present indebtedness and to carry out an extensive campaign of development at the property.

Several years ago the Octave was suspended and later was abandoned. The property was sold and was bought in by Mr. Gibbs, who reorganized the company.

In the early days the Octave produced the richest gold ore ever found in Arizona. The ore occurred in large bodies, under option, will be started soon. A complete development plan is on the ground and the mine is well equipped in other ways.

James T. O'Hara has purchased the Schmidt group of five claims from C. Dreis and Ernest Degan. The property is located near the Last Chance mines and has been well prospected. Over 2000 feet of underground exploration has been accomplished. Abundant wood and water are in the vicinity and the S. F. & P. railroad runs close by. Mr. O'Hara expects to erect a quartz mill on the group at once. He was formerly an operator in the Cripple Creek district.

At the Eureka mine, near Walker, Stukely Bros. have commenced operations. So far as exposed the vein is 28 inches wide and there is every indication that it will widen with depth. Values range from \$40 to \$60 a ton in gold at a depth of about 200 feet.

This property has excellent surface indications and has been worked more than any other in the Walker district. The present owner, under option, will be started soon. A complete development plan is on the ground and the mine is well equipped in other ways.

## ARIZONA COPPER CO. LOSES IN TAX CASE

Decision in Supreme Court From Greenlee County Involves \$50,000, Fees, and Interest.

Phoenix, Ariz., Sept. 27.—A decision involving about \$50,000 has been handed down by the supreme court in the case of the Arizona Copper company versus the county of Greenlee. The company must pay the taxes assessed against it in 1911 by John M. Webster, then county assessor of Greenlee. In addition the company must pay 25 percent for attorney's fees, 12 percent interest on the principal and six percent on the attorney's fees. The interest charge dates from the second Monday in December, 1911. The fees go to George J. Stoneman and Reese M. Ling, who were attorneys for the company. The case was argued into the case as associate counsel for the county.

In 1911 county assessors were directed by the ritual board of equalization to assess property for 40 percent of its cash value. Webster assessed the Arizona Copper company's smelter and mine improvements at \$1,529,453.50, the mine itself being assessed under the Doran bullion law. When the company filed suit it alleged that it had been assessed for 60 percent of the value of its improvements.

In the county court, the county went out and the company appealed to the supreme court.

It was not admitted by the supreme court that the assessment was high except for the sake of argument.

## MINE CASE MUST BE TRIED IN GILA COUNTY

Phoenix, Ariz., Sept. 27.—The case of James A. Fleming versus the Black Warrior Copper company, announced to have the transfer of that company's holdings to the Warrior Copper company set aside, was tried in the superior court of Gila county. Such is the decision of the supreme court.

Fleming originally owned the Black Warrior, which is one of the most valuable properties of the Globe-Miami district. He sold the greater part of his interests to Philadelphia investors. First the Black Warrior Amalgamated was organized and then it was reorganized as the Warrior Copper company. Fleming alleged that the reorganization was for the purpose of freeing out himself and other stockholders.

## MINING NEWS

## KINGMAN DISTRICT MINES ARE ACTIVE

Developments Resumed on the Pittsburg; Hackberry Mine Sold.

Kingman, Ariz., Sept. 27.—Developments have been resumed at the Pittsburg mine, better known as the Walsh, west of Gold Road. S. R. Porter, one of the most successful mining men of Mohave county, is in charge.

The first work undertaken is the sinking of a shaft, which is already down more than 100 feet. It will be sunk to a depth of several hundred feet as soon as possible.

Orders have been received by Mr. Porter to start work on the Leland mines, which are controlled by a syndicate with which he is associated. He expects to have a force at work by Oct. 1.

Important determinations are being made in the old Distaff mine, at Chloride. Splendid silver-lead ore is being taken from the 100 foot level, below the adit drift.

The weekly bar of bullion from the Gold Road mine was worth \$17,500. It is understood that within a short time the production of the mill will be greatly increased. The bars now being sent to the mint more than make all the expenses of the extensive development work that is going on.

## May Not Sell International.

The trustees' sale of the interests of the International Mines company in the George Washington group, at Mineral Park, was postponed till October 25. A settlement of the company's affairs is now in progress and it is quite possible that the sale will not be held at all.

S. Tyler will soon make a shipment of high grade ore from his mines east of Mineral Park, high up on the Cerbat range. His ore carries silver, copper and gold.

## Take Over Hackberry Mine.

Qualey Bros., and L. A. Dockery have entered a deal for the taking over of the old Hackberry mine. This mine was one of the first to be operated in Mohave county and it produced a great deal of rich ore.

Robert D. McCausland has opened several feet of copper ore in a Mineral Park wash property that he holds under bond. He is bending all efforts toward reaching the water level. If the ore continues down to water the mine is a valuable one.

The ore body on the 500 foot level of the Hackberry mine is increasing in size and value as the drifts are extended along the ore zone. The width is increasing gradually and a small increase in gold and silver values, as well as copper, is noticeable.

## Copper Giant Improving.

At the Copper Giant mine a station has been cut in the 300 foot level and drifts are being run off in both directions on the vein. In one drift eight feet of splendid copper ore has been exposed. The indication is promising in the other drift. The dump is piled high with ore and the bunkers are being rushed to capacity. The mine is now being handled to Hackberry, the nearest railroad station, from which point it is shipped to the Jerome smelter. The ore is being carried by the railroad siding at Valentine, somewhat nearer the mine, is in shape, a carload of ore will be shipped each day.

## Rush Work in Nevada-Arizona.

Work is being rushed in the Luck-nor shaft of the Nevada Arizona Mines company, where a fine body of high grade milling ore was recently encountered below the 200 foot level. Samples taken from this ore body ran to \$25 and the lowest assay was above \$7. The sinking of the shaft another

## Many Books are Added For Winter Reading

Practically Every Branch of Literature Is Included in the New Books Received at the El Paso Library.

BOOKS added to the El Paso Public library for the winter reading season embrace practically every branch of literature. A list of the new books has been compiled and is given below:

## Fiction—Adult.

Adams, "Kailoulani."  
Adams, "Secret of Lonesome Cove."  
Backus, "Career of Doctor Weaver."  
Barbour, "Joy of the Jasmine."  
Beach, "Iron Trail."
